Specifically, the partners were prompted to: The preparative  
organizational activities of the IC3 have already started.  
Furthermore, International Organizations assisted in the  
establishment of contacts through access in their networks of  
energy concerned professionals and provided interface with  
strategies developed from a wider European perspective.  
Consortium's Exploitation Strategy The exploitation strategy is different  
In case of risk evaluation for people, Damage that is the  
number of loss lives per event is evaluated from the overlap  
of Effects and Vulnerability and multiplying the result for a  
Fatality Level coefficient the number of people that died  
because of the accident event So Risk can be determined by  
multiplying the frequency of occurrence of the undesirable  
accident by the related damage. The environmental risk is  
included in the technical one as environmental impacts are

usually determined by the technology or caused by an accident or a human or technical malfunction.

Through the experience, also the combination of solution algorithm was improved. The supply line is intended to describe the delivery of the commodity to the country and for linking the corridor's model with the Country Reference Energy System. The REACCESS consortium ensured the careful and early planning of all dissemination activities through a detailed Dissemination Plan worked out in the beginning of each semester, specifying the dissemination activities D7.
