He made substantial discoveries in anatomy, civil engineering, geology, optics and hydrodynamics but he did not publish his findings and they had no direct influence on later science. If you prefer to suggest your own revision of the article, you can go to edit Da Vincis Anatomy requires login. Figure 3 Fetus in utero, circa

Leonardo made over detailed drawings and wrote about 13, words towards a treatise. Maps were extremely rare at the time and it would have seemed like a new concept. We welcome suggested improvements to any of our articles.

He created this map in conjunction with his other project of constructing a canal. Leonardo pushed these two things further than anybody. That's probably because Leonardo had a tough time finding female corpses to dissect, explains Peter Abrahams, a practicing physician at the University of Warwick Medical School in the United Kingdom.
