Brief assessment and triage, which is ideally unobtrusive and
typically brief in most acute disaster contexts, is a
competency domain encompassing screening and assessment
activities designed to differentiate functionally discrete
subsamples of PFA recipients, and to determine acute i.
Reviewers of early versions of the PFA competencies were
members of PERRC and PERLC advisory groups, which were
composed of representatives from the fields of education,

environmental health, health care administration, local and state government, medicine, psychology, social work, and sociology. The limitations of this and all consensus-derived competency sets, even when supplemented by field validation, are readily acknowledged. WorldHealthOrganization; Please review our privacy policy. It is to be integrated into, and done along with, other physical health and rescue interventions. Five essential elements of immediate and mid-term mass trauma intervention:

IntJSustainHighEduc.LeeMcCabe,GeorgeS.Facilitative attitude and affective subcompetencies are revealed in provider statements that reflect an understanding that psychological distress is normally expected under many situations and that interventions, though typically not needed, can be performed with confidence.
