We then examine the extent to which domain-specific theories interact, and how people reconcile competing causal frameworks. In outlining the work of Piaget, information-processing accounts and neo-Vygotskian theories, she also evaluates their different explanations of cognitive development and their implications for education. Members of Aboriginal, Torres Strait Islander and Maori communities are advised that this catalogue contains names and images of deceased people. SupportCenterSupportCenter. Furthermore, one of the communities in this study was less rural and had higher levels of biological knowledge, but this did not relate inversely to frequency of witchcraft explanations. Abstract Human cognition entails domain-specific cognitive processes that influence memory, attention, categorization, problem-solving, reasoning, and knowledge organization. TheChildasThinkerisessentialreadingforallstudentsofcognitivedevel one very important developmental change is the ability to test and evaluate theories in a methodical, scientific manner Figure 4.
