Perhaps it is the result of methodological differences. Opportunity for self-directed learning. More students were invited to participate but data collection from virtual students is fraught with difficulties because they tend to not comply with the surveys or other activities that are not graded because they are working professionals with limited time.

In this study, we will evaluate the results for one such online course, Spanish. Pedagogical design of computer mediated communication tasks: While distance-language education may never provide the same quantity of interaction as in situ courses, recent research indicates that the quality of textual CMC interaction has close similarities with the exchanges that take place in

face-to-face conversations in conventional classes Blake,
