For example, if the student has 10 I might have them get 5 red and 5 purple fish and model five plus five equals ten. We recommend By Zergnet.

What prior knowledge should students have for this lesson? The best things about

I might also model the addition concept for smaller numbers.

The controls allow users to move beads individually or 10 at a time to model different counting and calculation strategies.

When the sequence gets to the end of the line, the count sequence continues at the front of the Lets Go Counting.
